AT-HOME WELLNESS TEST FOR PETS

## AT-HOME DIAGNOSTIC AND MONITORING TEST FOR PETS

### About the CheckUp Product Line

Coastline Global (manufacturers of Kit4Cat) is pleased to introduce our newest veterinary product line: CheckUp. CheckUp for Cats and CheckUp for Dogs are products for veterinarians to sell in-clinic to pet parents for home use.

Too often, clients do not return for needed follow-up testing in spite of the importance of monitoring patients' chronic diseases, assessing response to treatment and adjusting treatment plans. CheckUp kits are thoughtfully targeted towards this segment of your client base. These kits are not meant to replace in-clinic testing but to encourage follow-up visits from patients who experience abnormal results.

CheckUp kits also provide a simple method for easily collecting urine from both dogs and cats at home. While veterinarians often ask clients to bring in urine samples for routine wellness visits, in reality, it is difficult for pet parents to do and the samples rarely are brought in. Patients without routine urine samples checked leave many potential conditions missed. Patients without follow-up after treatment may leave many with known conditions unresolved or poorly regulated.

Included in each box are small test strips which can be used at home that test for limited but essential urine parameters. If appropriate, clients can be told to use these strips to monitor their pet's urine on a regular basis or to use the kit to collect urine to bring into the veterinary clinic for a full urinalysis.

### Applications of CheckUp for Vets:

- ✓ Encourage needed follow up testing and closer monitoring by pet parents
- ✓ Regular monitoring of pets prone to bladder infection
- ✓ Detection of silent UTIs, which are common in pets with Diabetes, Cushing's, and cats and dogs prone to bladder stones
- ✓ Monitoring of patients on specialty diets, which are meant to control urine pH

CheckUp kits monitor the following parameters:

- ✓ High Glucose Levels
- ✓ Protein
- ✓ pH
- ✓ Blood in Urine
